PROFILE SUMMARY

Targeting **Full Stack Developer** roles with an organization of high repute with a scope of improving knowledge and further career growth.

Highly motivated and detail-oriented Java Full Stack Developer with a strong foundation in both front-end and backend technologies. Proficient in Java, Spring Boot, Hibernate, and RESTful web services for server-side development, coupled with expertise in HTML, CSS, JavaScript, and Angular/React for crafting dynamic and responsive user interfaces. Demonstrated ability to learn and adapt quickly to new technologies and methodologies. Excellent problemsolving skills, effective communication abilities, and a collaborative team player committed to delivering high-quality software solutions.

EDUCATION

Rayalaseema University

B. Com in Computer Applications

Atmakur, Andhra Pradesh

Graduation, May 2024

CGPA: 8.4

SKILLS

Programming: Core java, Adv. Java (J2EE), JDBC, JSP, SERVELET

UI Technologies : HTML, CSS, JAVASCRIPT

Frameworks : Spring, Spring Boot, Spring Micro services, Hibernate,

Database : Oracle, MySQL

PROJECTS

Bank Application with Spring Boot Web Development

June 2024

Technologies Used: Spring boot, Spring MVC, Hibernate, Html, CSS

A full-featured Bank application. It includes login and option deposits among other things.

Responsibilities:

- Developed RESTful API's using Spring Boot.
- Implement Business Logic and Data Access Layers with Spring Data JPA and Hibernate.
- Integrate back-end services with front-end application using HTML, CSS.
- Using tools like Postman and Rest Assured for API testing.

Employee List Rest Api with Spring Boot

July-2024

Technologies Used: Spring Boot, JPA, Hibernate, SQL

- To implement an Employee List REST API with Responsibilities in Spring Boot, we will extend the application to focus on employee roles and their responsibilities
- A Spring Boot REST API Projects for employee list that allows to manage users to manage data in an organization.
- In this scenario, each employee will have a list of responsibilities, and we'll build an API that allows CRUD (Create, Read, Update, Delete) operations.
- This Spring Boot REST API provides endpoints for managing employee information, including roles and responsibilities
- By using **JPA** and **Spring Data**, we've simplified the **Database** interaction, and responsibilities are managed as a collection of strings stored in a separate table.

ACADEMIC ACHEIVEMENTS

- Earned a certification in Java Full Stack Development, demonstrating proficiency in Satya technologies and project management.
- Utilized java, Spring Boot, Hibernate for the back-end and HTML, CSS, JavaScript for the front-end.
